## About Me

I've been coding for over 5 years. I am a software developer who loves building web applications & learning new technologies. I've also helped a number of people learn how to code. I have also conducted technical interviews for newcomers in companies. My interest in programming leads me to study Computer Science deeper. Learning new languages is so much enjoyable as they open new solutions to actual problems and make people's lives easier.

## Work Experience *(5 years)*

**React Software Engineer,** *at Codemotion Ninjas LLC*
Codemotion Ninjas LLC provides complex web development for Fintech, Logistics, and Startups
